The diagram illustrates a process flow. It begins with an external source (indicated by an arrow from the top left) pointing to a table. This table has a header row with four cells: '13', '5ημ.', '6ημ.', and '8ημ.'. Below the header is a row labeled 'Class-diagram-v0.1'. The bottom section of the table is divided into two columns: '14/5/2022' and '20/5/2022'. An arrow points from the '20/5/2022' cell to a second table below it. From the right side of this second table, an arrow points to a diamond shape. Finally, an arrow points from the bottom of the diamond to an external destination (indicated by an arrow pointing to the bottom right).
